

POOJA PUNJ

Student

📞 : 08146150414, ✉ : punjpooja26@gmail.com

📍 : Phagwara punjab, Phagwara, Punjab.

D.O.B: 10/31/2005

Gender: Female

Marital Status: Single

Nationality: India

SUMMARY

AI/ML Engineer and Backend Developer skilled in Python, SQL, machine learning, data analysis, REST APIs, and database-driven application development. Experienced in building AI-powered applications, intelligent agents, MCP-based systems, conversational solutions, and scalable backend architectures. Strong interest in applying AI, automation, and data-driven approaches to solve real-world problems.

EDUCATION

GNA University - Bachelor Of Engineering

(Computer Science And Engineering)

Phagwara, Punjab.

August 2023 - August 2027

CERTIFICATE

Certificate of Internship completion-ThCoders(3months)	June-August 2026
Data Analytics Job Simulation-Deloitte	January 2026
Training Completion Certificate-Coder Roots	August 2025
Python for Data Science-Saylor.org Academy	January 2026
Hackathrone1.0 Participation Certificate-Geeks for Geeks	August 2024
Hckathrone-AICerts	August 2024

AWARDS

Received Best Paper Presentation Award at the National Conference “*Research Libraries: Adapting to Digital Form using Indian Knowledge Systems (IKS)*” (NIKS-DR 2026), Chitkara University (ICSSR sponsored).

PROJECTS

- Spotify Dashboard (Data Visualization)
- Built an interactive Spotify data dashboard to analyze user listening patterns, top artists, and genre trends.
 - Used Python, Pandas, and Streamlit/Power BI for data processing and visualization.
 - Enabled insights into user behavior through dynamic charts and filters.

AI Chatbot & Web Application Development

- Collaborated on the development of **AI-powered chatbots and full-stack web applications**, contributing to both frontend and backend implementation.
- Developed and integrated **REST APIs** to connect frontend interfaces with backend services, databases, and AI capabilities.
- Contributed to chatbot functionality including **conversation handling, API integration, database interaction, and dynamic response generation**.
- Worked on debugging, testing, performance improvements, and resolving frontend-backend integration issues.
- Collaborated with team members using **Git/GitHub** for version control, branching, pull requests, and feature integration.

Student Performance Prediction

- Created a predictive model to analyze and forecast student academic performance.
- Used classification/regression algorithms (e.g., Logistic Regression, Random Forest).
- Identified key factors affecting performance such as study time, attendance, and demographics.

Sentiment Analysis using Machine Learning

- Built a sentiment analysis model to classify text data (positive, negative, neutral).
- Applied NLP techniques (tokenization, TF-IDF, preprocessing) and ML models like Naive Bayes / SVM.
- Achieved accurate sentiment classification on real-world datasets (e.g., reviews/social media).

AI Object Detection | Python, OpenCV, Deep Learning

- Built a computer vision system for **real-time object detection** in images and video.
- Used **Python and OpenCV** with deep learning-based detection techniques to identify objects and generate bounding boxes with confidence scores.
- Implemented image preprocessing, model inference, and performance evaluation.

SKILLS

Programming Languages , Data Analysis & Visualization:

Python, Data Cleaning, Exploratory Data Analysis (EDA), Pandas, NumPy, Matplotlib

AI & Machine Learning:

Machine Learning, Deep Learning, Computer Vision, Object Detection, Natural Language Processing (NLP), Generative AI, AI Agents

Backend Development:

FastAPI, REST APIs, API Integration, Backend Development, Authentication, Database Integration

AI & Developer Tools:

OpenAI APIs, MCP (Model Context Protocol), Git, GitHub, Docker

Databases:

MySQL, PostgreSQL, SQLite, SQLAlchemy

Data Analysis & Visualization:
